

## REMODEL THE ORDINARY INTO EXTRAORDINARY EYNK DESIGN

In my experience of 7 years, the most exciting swanky work is designing kids' areas – Bedrooms, playrooms, study spaces & Bathrooms.

We at EYNK, create magical dreamy comfy spaces for kids including Nursery, toddler spaces, and teens too. Designs are all connected emotionally & practically and every concept has a story.

Our latest project on kids focuses on pastel color themes with stylish wall art and wall murals including clouds, windows, stars, etc. In the Nursery project, we focused on a picnic theme where sibling bears are enjoying & playing with the universe in a magical world where the sun, moon, and stars are all together.

We try to give the best story to all kids, we design for. Every child has different likes, and we at EYNK try to pamper the most.

Another project, where it's about a daughter's room. Every mother wants to give her best to her daughter which she missed in her childhood. Here, also a mother made sure that EYNK design her twin daughter's room just out of the box.

We catered to Pastel colors, a story of a princess where there is a castle behind a big cloud and all colorful nature around it.

In the end, I feel blessed that I have the opportunity and skills to create a magical, dreamy, colorful world for each & every child in this world. We are thankful to each parent for all the love, belief, and faith on EYNK to design their child's world.
